

»» C2TECH Monitoring and Replay Solution

Monitoring of intercepted IP flows plays a key role for LI which enables user interface and rendering of communication. C2TECH Monitoring and Replay solution allows user friendly interface and has many facilitative features. Monitoring and Replay solution is based on state-of-the-art web technologies which allows secure and remote analysis of the intercepted data.

- Allows web based monitoring
- Designed and developed based on the state-of-the-art web technologies for delivering secure robust, scalable multi-platform applications and services
- Allows detailed monitoring of IRI and CC
- Native view for instant messaging (IM), e-mail (POP3/SMTP/IMAP) and HTTP sessions
- Automatic character encoding
- No external application is required for mail representation
- Pre-filtering captured data on date and protocol
- Post-filtering on specific protocol attributes
- Supports multiple language for view
- Supports dual world language for monitoring
- Multiple users can simultaneously access the same data

- A single user can investigate multiple intercepted targets
- Supports fine-grained access controls that allow the LEA to determine exactly who gains access to which data for strict security requirements
- Displays intercepted traffic in chronological order
- Support continuous playing via time-scale view
- Powerful calendar-based overview
- Supports historical analysis of a specific target to obtain such information as: Number of Emails, Number of VoIP Calls, Web sites visited etc.
